"Price greater than or equal to"

- "Price greater than or equal to" should be set at an Alert Value above the current price of a stock.
- The alert will be triggered once the criterion is hit. For example, if Alert Value is set at > or = to \$1.00, then the alert will be triggered when the price of the stock is > or = to \$1.00.
- The stock alert will only be triggered once a day.

For example, if Alert Value is set at \$1.00, the stock price must fall below \$1.00 and re-breach or be equal to the \$1.00 level before the stock alert is next triggered.
